

With Great Memory Comes Great Power!

The award-winning OCZ PowerStream is a leading-edge solution for today's high-end systems and servers. OCZ designed the PowerStream power supply family for users looking to maximize performance and minimize noise. The PowerStream comes equipped with ultra-quiet PowerWhisper Technology, the PowerFlex feature with individually adjustable power rails, and PowerShield power leads. Encased in an eye-catching chrome finished exterior, OCZ PowerStream is packed with solid features to ensure flawless, high-quality power. With up to 600 watts of PC-nourishing power, this durable power supply is a reliable source of power for any system. Any other unit would simply deprive your system of its full potential.

Sophisticated Features:

Silent

The OCZ PowerWhisper technology keeps noise levels below 23.0 dBA (less than the threshold of human hearing), making this the quietest power supply on the market!

Powerful

420/520/600 Watt power supplies with 520/620/700 Watt Peak Load, designed specifically for the most demanding computing environments of gamers, PC enthusiasts, and power users.

Adjustable

The OCZ PowerFlex features for fine-tuning the three adjustable power rails (+3.3V, +5V and +12V). An LED sits below each of the three adjustment dials; a green light indicates voltage is within $\pm 5\%$ of optimal, a yellow light indicates undervoltage, and red indicates overvoltage.

Cleaner Power

The OCZ PowerStream offers 6 independent DC output rails combining with OCZ PowerShield technology for more stable voltage and cleaner power output. The OCZ PowerShield EMI Control technology with copper-shielded power leads provides extreme current stabilization and is an ideal solution for high-resolution applications such as PC games, video editing, and 3-D graphic design.

Universal Connector

With its universal ConnectAll connector, the PowerStream power supply offers all-in-one connectivity: (20-pin + 4-pin) for ATX12V to (24-pin + 4/8-pin) for BTX/EPS12V. The OCZ PowerStream also includes 2 (two) connectors for high-end graphics cards, 1 connector for PCI Express, and 2 Serial ATA connectors on two separate cables.

OCZ 5 Year Warranty:

Only OCZ offers a 3-year warranty supported by OCZ Technology exclusive PowerSwap program. No more endless return-for-repair loops! Additional 2-year limited warranty.

OCZ ConnectAll Technology

Universal user friendly, all-in-one transformable mainboard connectors:
 • 20-pin + 4-pin for ATX12V to (24-pin + 4-/8-pin) for BTX / EPS12V

OCZ PowerFlex Technology

Independent adjustment knobs for each voltage output

- + 3.3 VDC adjustable from 2.8V to 3.8V
- + 5 VDC adjustable from 4.5V to 5.5V
- + 12 VDC adjustable from 10.8V to 13.2V

OCZ PowerShield Technology

Stabilizes the current, maintaining optimal signal integrity to your monitor and hard drive.

Technical Support:

Just as OCZ Technology is committed to bringing you the best products for your personal computer, we strive to provide the best customer support in the industry. Please feel free to email us at: support@ocztechnology.com
