■ FEATURED PRODUCT: OCZ DDR2 PC2-8000 Series

OCZ adds fuel to your fire with the new OCZ DDR2-1000 series! Released last month just in time for CeBIT, the two new 1GHz parts were added to the renowned OCZ Platinum series. Rated at CL 4-5-4, the PC2-8000 Platinum Extreme Edition is the World's first reduced latency 1GHz memory product. OCZ Technology, upholding a legacy of innovation and commitment to the enthusiast, developed the new PC2-8000 Platinum XTC series to advance next generation platforms to the next performance level, ensuring enthusiasts are not restricted by the limitations of their memory. No other company offers CAS 4 latency at 1GHz, making these ground-breaking modules the industry's fastest memory.

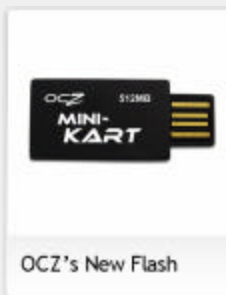

RAM never looked so good!

In addition to CAS 4 DDR2-1000 modules, OCZ will be offering the PC2-8000 Platinum XTC series with 5-5-5 timings at a lower price point to make the performance of 1GHz speed available to everyone. Both products will come in high capacity 2GB dual channel kits to meet the demands of today's high performance gaming rigs and desktops. The unique design used in the award winning XTC heatspreaders optimizes the thermal management of memory modules by promoting greater airflow than conventional heatspreader designs. All OCZ Technology memory is backed by an industry-leading Lifetime Warranty and direct Technical Support.

RAM never looked so good!

■ Look for OCZ's New Flash Soon!

In March, OCZ previewed their new flash products at CeBIT 2006. Soon to be released, the new "Mini-Kart" Ultra Slim USB 2.0 Flash Drive and OCZ's own Secure Digital Flash Memory product line will please fans of OCZ's quality and reliability. The super slender and lightweight Mini-Kart holds up to 2GBs of data in an ultra-compact unit that you have to see to believe. Designed for ultimate reliability, the Mini-Kart makes things simple with its True Plug and Play functionality and superior cap-less and portable design. The ultra-reliable OCZ Secure Digital™ cards are ideal for high performance digital cameras, MP3 players, PDAs, GPS units, PCs, and more! Store and transfer everything from photos, music, and videos in virtually all your favorite digital devices.

OCZ Wins Best Overclocking Memory Manufacturer!

OCZ Technology is pleased to announce their second Xbit Reader's Choice win in the "Best Overclockers Memory" category. OCZ outshined the competition yet again this year and became the first memory manufacturer to ever win the prestigious industry poll two years in a row. "Active promotion and successful marketing campaigns as well as quality products allowed this company to win in our poll with pretty high results two years in a row."

OverclockerCafe Recommends PC-4000 Platinum XTC!

"The OCZ EL PC4000 memory kit with the XTC memory heatspreaders is a worthwhile upgrade for anyone doing some two gig memory shopping. Performance, stability and a competitive price all come together here to put this RAM on the short list of any gamer or enthusiast."

PC-4000 Gold XTC Highly Recommended by Pro-Clockers!

"OCZ has not failed with any of their performance ram thus far and the success continues with this ram as well. With two gigs of ram vastly becoming a norm for an enthusiast and gamer the PC4000 XTC gold would be a good kit to look into. Putting value and performance together is a must for anyone that falls into this category. And the XTC shields are a great way to show off the internals of your PC case. OCZ remains at the top of the class when it comes to ram."
