

FEATURED PRODUCT: EliteXStream 800W and 1KW

Demand the best! The Alpha dog of power supplies is the new OCZ EliteXStream, the top choice for high-powered systems and workstations. Designed as an enthusiast-grade computer power supply with a gold-medal architecture, the EliteXStream is the ultimate power solution for users that demand ultra-efficiency, advanced reliability, and high-wattage solutions for leading-edge gaming machines.

Ultra-efficiency and advanced reliability for leading-edge gaming machines

OCZ designed the 800W and 1000W EliteXStream for optimum power distribution to all components by utilizing the highly efficient "single +12V rail" design perfected by PC Power & Cooling. Providing sufficient power for all your high-end components including multiple GPUs, each powerful yet energy-efficient EXS model is certified under the 80+ efficiency program so they run cool and save on utility power. Equipped with a complete array of connectors including four 8 pin (6+2) PCI-E and 17 drive connectors, a large 120mm fan, and a standard ATX power supply form factor, you're good to go with the EliteXStream, one of the industry's most robust consumer power supply designs on the market and backed by an incredible 5 year warranty and unmatched technical support from OCZ. How's that for red-carpet ready?

OCZ Sponsors Major International Gaming Leagues

In 2008 OCZ Technology has upped its involvement in the global gaming community by partnering with two internationally renowned e-sports organizations, Cyber Evolution (CEVO) in the U.S. and Game Star League (GSL) in Germany. OCZ has been active in the competitive gaming community for years by delivering high-performance hardware specially tailored for their demands, and is proud to announce these news sponsorships that will reach out to America's and Europe's best gamers. OCZ strives to continue supporting the gaming communities it specifically designs its high-performance hardware for, and is eager to uphold the mounting enthusiasm for recreational and competitive eSports with CEVO and GSL.

OCZ continues to support the gaming communities

Vendetta 2 Is Top CPU Cooler of Q1 2008 at Benchmark Reviews

"When the dust settled, our second half of the benchmark testing indicated that we have a new champion among CPU coolers: the OCZ Vendetta 2. The exposed heatpipes formed from polished copper, along with polished aluminum fins lined with effective pebbles, create a look you can't really help but to appreciate the functional fashion OCZ has designed into the Vendetta 2. The construction found in the Vendetta 2 is what I expect all CPU coolers to have: visually flawless and structurally sound. The OCZ Vendetta 2 was very easy to install since it uses the standard pin-style compression clips."

EliteXStream 1KW Performs its way to Gold Award at [H]ard OCP!

"The OCZ EliteXStream 1000w was from all of our testing results an excellent power supply. The unit exhibited very good voltage regulation, excellent efficiency, was reasonably quiet for a power supply of its capacity, and featured immaculate construction. In the end, when we look at all of the factors that we use to evaluate the performance of a power supply the OCZ EliteXStream is quite simply the best 1000w power supply that OCZ, or its subsidiaries, have produced to date and is certainly a stellar option for enthusiasts to consider in their next high end system build."

Rally2 32GB is the Best High Capacity Flash Drive at Matbe

"The OCZ Rally2 32G is definitely better than the Corsair Voyager, as well in read as in write speed. Moreover, both USB drives have the same price. So if you are searching for a 32G USB drive, you should definitely go for OCZ, you will not be disappointed."
