

FEATURED PRODUCT: Summit SSD

Aim for top performance with the latest OCZ SSD! Summit Series 2.5" Solid State Drives are tailored to meet the stringent demands of business professionals, enthusiasts, and entry-level enterprise applications, bridging the gap between the needs of high-end gaming and professional desktops and notebooks to small scale server PCs that require amplified criteria for maintaining a solid and stable work environment. For work or play, the Summit is for you and your system!

Summit Series provides the best of both worlds where performance meets unmatched reliability

OCZ Summit Series SSDs provide the best of both worlds where performance meets unmatched reliability, offering the ideal balance to store and transfer your most essential data. The Summit Series is the new wave in SSD solutions for users seeking an enhanced experience from their notebook or desktop, such as snappier speeds and access time, longer battery life, and shorter boot-ups. Ideal for even mission-critical systems, the Summit Series delivers best-in-class stability and dependability along with faster access times, lower power consumption, and superior durability compared to conventional hard drives. The missing link between an enthusiast SSD and a server grade SSD, Summit Series can future-proof your system and provide an unsurpassed computing experience.

OCZ at Computex and E3 this June

Whether you're on the West Coast of the States or the East Side of Asia, OCZ will be there ready to show off its latest products and enthusiast solutions.

Hope you can make it!

Silencer 910 Makes a Silent Splash at CPU3D

"I have to say, after testing the PC Power & Cooling Silencer 910W PSU, I wasn't disappointed at all. PC Power & Cooling never cease to amaze me with the build quality, stability and power efficiency of their power supplies. The Silencer 910W is one of the most powerful PSUs that we've tested to date, that offers all of the above as well as silence. Featuring a powerful single +12V rail at a massive 74A, it's more than enough to satisfy the needs of the most demanding user and enthusiasts."

Neutrino Netbook wins Innovation Award at Legit Reviews!

"The OCZ Neutrino 10" DIY Netbook was a blast to work with as everything worked perfectly. If you happen to have a SATA notebook hard drive and memory kit sitting around this system is a killer deal. The nice thing about the Neutrino is that the you can save a few dollars doing it yourself, especially if you plan on installing Windows 7 or Ubuntu 9.04. The OCZ Neutrino 10" DIY netbook costs slightly less than other pre-configured notebooks and is rock solid with Windows 7."

Blade Kit Slices the Competition at OC3D

"The OCZ Blade kit is without doubt the fastest kit we have tested to date. No sooner had I reviewed the Dominator GT's last week, do OCZ slam dunk them into the history books with a phenomenal, extreme performance 6GB DDR3 kit. Performance wise, whichever your preference, be it bandwidth or latency, you have a kit full of win/win with the OCZ Blade CAS7 6GB kit which holds true to its promise of 'The best performing DDR3 memory on the market'. For that reason alone it deserves our prestigious Performance award."
