

FEATURED PRODUCT: OCZ Special Ops Edition

HOOAH! Gear up for operation FRAG! Introducing the new OCZ Special Ops Edition offered in PC-3200, PC2-5400, and PC2-6400 speed grades. This new line of OCZ memory features a unique camouflage motif XTC heatspreader and a price tag that has an edge over competitors.

Serious gamers put heavy bandwidth requirements on their memory, and put a premium on both superior performance and dependability. The new OCZ Special Ops Edition (SOE) memory modules and dual channel kits feature the ultimate balance of speed, reliability, and high capacity, making them an ideal solution for gamers. The Special Ops Edition line will be available in 1GB modules and 2GB (2x1024MB) dual channel kits for the ultimate memory upgrade for the latest graphic-intensive PC games, such as Battlefield 2, Half Life 2, Doom 3, and Quake 4, which deliver the best end-user experience with 2GB+ of memory.

The OCZ Special Ops Edition falls under OCZ's new Limited Edition series featuring a number of exclusive OCZ memory modules. Tailored to select applications that include case modding, gaming, and overclocking, these unique modules are the perfect selection for consumers looking for something special for their next system build or upgrade.

Look for future innovative additions to come!

OCZ[®] EDGE

TechPowerUp Puts the Mini-Kart to the Test!

"The OCZ Mini-Kart redefines the meaning of thumb drive. While regular USB sticks are your full thumb's length, if not more, the Mini Kart goes merely to your thumb's first segment. With a height of only 2.8mm it is ideal to go into your wallet. This makes it possible to carry up to 2GB of storage around without having to track another thing in your pockets."

Pro-Clockers Awards the GameXStream the Editor's Choice!

"The GameXStream has demonstrated here today what all power supplies should be like and that is stable as all hell. During our testing and time with OCZ's newest gem, we did not see any major fluctuation at all. So, in parting the GameXStream delivered as promised."

Adrian's Rojak Pot Congratulates the OCZ Mini-Kart!

"Thanks to its diminutive size, the OCZ 1GB Mini-Kart certainly has an edge over its competitors. It's so thin you can keep it in your wallet! Those who are looking for something unobtrusive will certainly love its ultra-slim profile...As far as performance goes, this is a great card to read from. It showed very good read performance for both large and small files. In fact, it was the second-fastest drive in our large files comparison and the fastest drive in our small files comparison...With that said, we still feel that the OCZ 1GB Mini-Kart deserves a Reviewer's Choice Award."

Still Fast, More Furious! The Rally Redefined!

The OCZ USB 2.0 Rally2 Flash Drive is the sleeker and more ergonomic version of the original Rally. The redesigned Rally2 features a more stylish housing accompanied by a new signature OCZ ultra-bright orange status LED and still houses the renowned OCZ dual channel technology that made the first Rally the choice flash drive among enthusiasts. Thanks to the implementation of leading edge Dual Channel technology, the Rally2 puts data transferring in the fast lane and leaves the competitors in the dust.

The incredible OCZ Rally2 Flash drive is designed to be the fastest, most reliable USB flash memory drive on the market and comes backed with a Lifetime warranty for the ultimate peace of mind.
