

## FEATURED PRODUCT: VERTEX 2 1.8" SSDS

Thin is in! For ultra-portable storage, enthusiasts are no longer confined to slow, chugging hard drives, OCZ's new 1.8" form factor SSDs provide blazing speeds and minimal data access times for a snappy computing experience like no other!

The perfect companion for your thin and light notebook

The perfect companion for your thin and light notebook, netbook, or tablet PC computing companion, OCZ 1.8" Vertex 2 SSDs provide numerous benefits such as lower power consumption, superior shock resistance, and maximum performance when you're on the go. Catering to the entire range of mobile applications, excelling in 4kb random writes up to 50,000 IOPS, and offering up to 240GB capacities, Vertex 2 1.8" SSDs are the choice for your high-performance multimedia lifestyle.

## OCZ<sup>®</sup> EDGE

### Enyo grabs Editor's Choice at PureOverclock!

"In terms of performance, the Enyo is exceptionally fast, easily embarrassing USB 2.0, and even a traditional SATA hard drive for that matter. The read/write speeds for an external drive are outstanding. The beauty here is that the Enyo doesn't suffer the speed slowdowns of USB 2.0 or even eSATA. If you need absolute speed in an external drive format, then the OCZ Enyo is about as good as they come."

### The Silencer MkII 750W blows away Hardware Secrets!

"Efficiency was very high all the times, peaking 88.2%. Voltage stability was another highlight from PC Power & Cooling Silencer Mk II 750 W, with all voltages inside 3% of their nominal values. PC Power & Cooling Silencer Mk II 750 W is very good 750 W power supply: high efficiency, voltages very close to their nominal values (3% voltage regulation instead of 5%), very low noise and ripple on its outputs and an amazing seven-year warranty. In summary, a very good power supply that won't let you down."

## OCZ to Sponsor 2010 Flash Memory Summit in Santa Clara, CA

The Silicon Valley's destination for flash providers and developers, OCZ is proud to be a sponsor and exhibitor of this year's Flash Memory Summit. The premier showcase for the leading developments in this technology sector, OCZ's high performance SSDs will make their mark August 17 through the 19 at the Santa Clara Convention Center, booth #418.

### First Look at RevoDrive, Worthily Earns Editor's Choice at PC Perspective

"The RevoDrive is an absolute breath of fresh air to the PCIe SSD field. It is less demanding on system resources and remains an outstanding performer for its price point. Cost/GB is matched to that of conventional SandForce driven SATA SSDs, making this unit extremely competitive on price. If you're considering a pair SandForce SSD's for use in RAID and have a free PCIe 4x slot available, the RevoDrive is the best way to go."
