

## FEATURED PRODUCT: OCZ REVODRIVE PCI-EXPRESS SSD

It's an SSD Revolution! Developed to push the limits of storage technology, the RevoDrive is an innovative PCI-Express SSD that is already making waves in both raw performance and unmatched affordability for consumers. At nearly twice the speed of SATA II SSDs, the RevoDrive delivers up to 540MB/s reads and random 4k writes up to 75,000 IOPS, all while maintaining a price point that is not much more than its slower counterparts!

The RevoDrive comes backed with a 3-year warranty and ultra-reliable 2 million hour mean time between failure (MTBF) rating.

Packing a key mix of blazing throughput at an unbelievable price, this innovate solution is already blowing away the top tech sites, recognized as a true game-changer in the SSD arena:

***"The RevoDrive is stupidly fast in desktop workloads."***

– Anandtech.com

***"The RevoDrive is an absolute breath of fresh air to the PCIe SSD field."***

– PC Perspective

Adding to the value of this new storage solution, the RevoDrive comes backed with a 3-year warranty and ultra-reliable 2 million hour mean time between failure (MTBF) rating. Performance is calling, what are you waiting for?

## Flash Memory Summit 2010 right around the corner!

OCZ is gearing up for the final countdown to Flash Memory Summit, coming soon to the Santa Clara Convention Center August 17-19. Stop by to check out our enterprise solutions at booth #415, as we showcase the enterprise Deneva SSD line, along with entering the new RevoDrive for the Best of Show awards!

The final countdown to Flash Memory Summit

## OCZ EDGE

Xbit Labs editors are truly excited about the Vertex 2!

"The most exciting product in this review - the OCZ Vertex 2! Being the first SSD with a SandForce SD-1200 controller to be tested in our labs, it has proved to deliver excellent performance at loads typical of home computers. It is indeed very, very good. It is universal, too. High sequential speeds and very good performance in real-life applications. The lack of noticeable flaws in its firmware should also be mentioned. As a result, we are proud to award OCZ Vertex 2 SSD with our Editor's Choice title."

The Fatal1ty 750W PSU impresses OCIA.net!

"This OCZ 750W power supply will make a great looking addition to your system. The flat black painted chassis, wire chrome grill and low-profile modular cabling are aesthetically pleasing, and the nylon bag keeps your unused cables stored neatly. The Fatal1ty 750W presented no problems when it came to performance. Used in a typical modern, single-GPU gaming system, the 750W provides ample power with room to spare. OCIA.net awards the OCZ Fatal1ty 750W power supply our Silver Seal of Approval!"

Techgage blown away by Enyo's speed!

"It's no secret that OCZ produces some of the best SSD's on the planet, if not the best in many cases, and it's devices like the Enyo that helps keep the company's name at the forefront of related technologies. Compared to Super Talent's SuperCrypt drive, the Enyo is far superior. In the most important real-world ones, the Enyo came out the undisputed champion."
