

■ FEATURED PRODUCT: PC2-6400 SOE Urban Elite

OCZ's latest addition to the proprietary Special Ops Edition takes your gaming rig to the next level of performance. Thanks to an ideal balance of speed and latency timings, the new PC2-6400 SOE Urban Elite is for the most hardcore of hardcore gamers. Outfitted with urban camouflage motif heatspreaders, Urban Elite modules are made to stand out and not blend in with the rest of your system components.

The PC2-6400 Urban Elite, available in 1024MB modules and 2GB dual channel kits

The PC2-6400 Urban Elite will be available in 1024MB modules and 2GB (2x1024MB) dual channel kits optimized for the latest DDR2 platforms. Rated at 44-3 latency timings, these modules offer faster access times than current high performance PC2-6400 and give gamers the additional performance edge over conventional DDR2-800 memory. With today's games requiring a minimum of 2GB of memory, the Urban Elite Series is the supreme solution for gamers seeking the advantages of superior reliability and bandwidth management.

As OCZ continues to expand their award winning DDR2 line, we are proud to offer Gamers, PC Enthusiasts, and mainstream consumers a wide range of DDR2-800 solutions all guaranteed with their industry-leading Lifetime Warranty.

■ Catch OCZ at the Showdown Lanfest 2K6 in San Jose, CA

Dying to get your hands on some OCZ Gear? Come by the OCZ booth at the first annual Showdown LANfest held by *Maximum PC* and *PC Gamer*.

This sold out event features Counter Strike, Battlefield 2, Unreal, BYOC Tournaments and contests and much more.

Spectators are welcome to attend on Saturday and Sunday August 25th and 26th between 10AM and 10PM to check out the sponsors booths, watch editor clinics, and catch all the contest and tournament action.

The best action will be at OCZ's stand where you can see our latest gaming products, meet OCZ employees, and sport your OCZ pride.

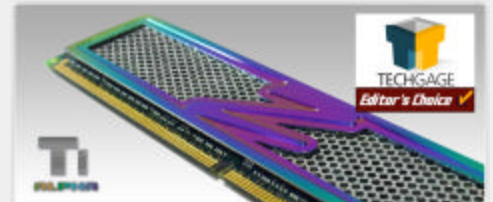

The best action will be at OCZ's stand

Virtual Hideout "Blown Away" by OCZ PC2-7200 SLI-Ready Platinum

"I whole heartedly award the OCZ PC2-7200 Platinum XTC memory the Editors Choice Award for it's stunning mirrored XTC heatspreaders and phenomenal overclocking ability. Obtaining 1080mhz out of 900mhz DDR2 today takes some very high quality memory, and OCZ has propelled itself to the apex of the memory market with the help of superb memory kits like this. I've already recommended this kit to many of my friends if that tells you anything. Let's not forget OCZ's lifetime warranty too! What more could you ask for!? Go buy this now!"

OCZ Ti Alpha VX2 Picks Up Techgagge's Editors Choice!

"Without a doubt, these are some amazingly fast modules...These are some of the -fastest- modules you can get your hands on today...If you are a hardcore enthusiast looking for modules to fulfill your tweaking dreams, and possibly set some records, you will not go wrong with these. "

TweakTown States the OCZ GameXStream is a "Must Have"

"After the dust settles, we end up with a very fine power supply that handled all levels of stress with no difficulties. Bottom line... If you've been looking into a power supply upgrade and have plans for building a high-end gaming machine, then let me recommend the OCZ GameXStream 600 to you. It has power to spare, has nearly full compatibility with any motherboard you may have, and has native support for more devices than you are likely to be installing anyway. It is difficult not to recommend such a unit to anyone, so do yourself a favor and make sure this one hits your short list of potential candidates."
