

HOLIDAY GIFT BUYING GUIDE - Game on with the perfect OCZ gear!

With money tight these days, especially around the holidays, give the gamer you love everything they need to get into the action, without breaking the bank! OCZ's holiday gift guide will help you find everything you need to create the perfect gaming PC... all items under \$100! From RAM to the mouse pad, gamers demand the most high-performance hardware to keep them performing at their best. With the deals you'll get on these items, prepare to feel like you've won the battle yourself! Prepare to catch some amazing deals on "Black Friday" from your favorite online e-tailers!

The Memory... *Fatal1ty DDR2-800 4GB* \$75
High-Speed DDR2 coupled with the amazing 4GB density will allow them to game hard with the latest graphic-intensive PC titles and operating systems. They'll never have to slow down and be delayed from the action with this championship gamer-developed RAM!

The Power Supply... *ModXStream Pro 600W* \$75
This power supply has everything they need to go pro! SLI-Certified to run the latest graphics cards, this PSU has just the right amount of power, excellent efficiency and 80+ Certified to cut down those energy costs, and modular cabling so they can configure their own personalized system exactly to their needs!

The Mouse... *Dominatrix Laser Gaming Mouse* \$35
Who says you need to spend an outrageous sum of money to get a fast, sturdy, comfortable, and feature-rich mouse? Not OCZ! This mouse is laden with everything a gamer desires, from adjustable dpi, additional weights, configurable macros, a 4-way scroll wheel, all in a super sleek and ergonomic design. Frag fast and adjust your player quickly with this ultra-performance mouse!

The Keyboard... *Alchemy Elixir Gaming Keyboard* \$30
A potent brew of everything that is normally found in a much pricier keyboard, the Elixir series features 10 tri-mode programmable macro keys, mode selection, a pop-up menu shortcut, and Windows® Media Players optical controller. The sleek design of the Alchemy Elixir Series will maintain comfort throughout long gaming sessions with its membrane tactical keys made from 100% rubber-coating for no-slip comfort and ergonomic design, coupled with an amazing 5 million cycle lifespan that will help you get your money's worth!

The Mousepad... *Behemoth Regular Mousepad* \$10
Think a mousepad is just a mousepad? The Behemoth lives up to its name, and with extra surface area compared to additional smaller pads, you'll never have to lift and readjust again! The no slip surface will keep them moving along without pause.

OCZ[®] EDGE

Legit Reviews credits nia as pioneer in the gaming market:

"Simply cutting down the reaction time of moving forwards and backwards could mean 1st or 2nd place in a match. Overall, kudos to OCZ for offering a product that gives everyone a glimpse of what is possible in future gaming. OCZ has opened the door to extra-sensory gaming and will always be known as the first company to release such a product to the mainstream market."

Tech Radar sees nia as "Gaming Utopia":

"We have a shining vision of the gaming future: We've finally got our hands on a retail unit of a device that brings us a little closer to this gaming utopia. There's a noticeable and impressive drop in reaction times, particularly when it comes to firing in a fast-paced first person shooter. There's enormous potential here, and certainly a great degree of player interest in the ultimate goal of mind-controlled games."

CHIP Magazine (Russia) finds use for nia in all computer tasks:

"You can use NIA in virtually all areas of work with computers - from games to the myriad other programs. The device is unique, and any similar or substitute NIA earlier was not met. NIA - is a new step in the development of computer manipulator, a step difficult, but significant. NIA is a significant step forward in the field of computer manipulators."

Theo Valich asks if the nia is the most important thing in IT industry:

"This device is just fascinating. There is tremendous number of people that were physically stopped from enjoying 3D worlds through their respective disability. NIA enables those people to start playing games and improve their life. And that is something that is not just commendable, but is truly inspiring. OCZ did a brilliant job with this one."
